DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marttner et al (2,153,263) (Marttner) in view of Hansen et al (5,884,679).

3. Regarding claim 1, Marttner discloses a metal can and a metal neck component seamed to the free end of the can body comprising a generally frusto-conical shoulder portion (21, Figure 7) and a cylindrical portion (22). Marttner does not teach a sleeve which fits over the metal neck. Hansen discloses a plastic sleeve that fits over the neck of a container (46, Figures 1, 2 and 5, column 2, lines 64-65, column 3, lines 21-24) having threads to allow attachment of a closure (50). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the use of a sleeve as disclosed by Hansen in the container disclosed by Marttner to provide a means for providing a closure on the container after its initial opening.

4. Regarding claim 2, Hansen discloses a detent (72, Figure 5) for fixing the sleeve on the container.

5. Regarding claims 3 and 4, Marttner discloses a support region (39, Figure 7) between the frusto-conical and cylindrical portions.
